

Applications

- Satcom X-Band Antenna Signal Distribution
- Ground Terminal & Intra-Facility Links
- Site Diversity Systems
- Electronic Warfare (EW) Systems
- Broadband Delay Line and Signal Processing Systems

Features / Benefits

- X-Band Link - Eliminates the performance and cost penalty of block conversion
- Low RIN Source Laser - Provides high-dynamic-range of $>102 \text{ dB Hz}^{2/3}$
- Microprocessor-Based Transmitter Control for Laser Bias, Modulator Bias & Link Gain - Provides consistent high performance operation and allows for modulator low-bias operation and SFDR $>102 \text{ dB Hz}^{2/3}$
- Compatible with EMCORE's Modular Optiva Platform - Allows multiple format and frequency transport in a single chassis
- DWDM Operation - Increases transport capacity without increasing fiber count

The Optiva OTS-2 X-Band transmitter and receiver are ideal to construct 7.000 to 10.000 GHz transparent fiber optic links for antenna remoting, electronic warfare systems, broadband delay lines, signal processing systems and other high-dynamic-range applications.

Optiva satellite and microwave transmitters and receivers are SNMP compliant. They can be housed in the same chassis and monitored by the same Network Management System (NMS) as other Optiva cards to support transport of multiple signal formats and frequency bands in a single flexible platform.

System Design

The Optiva platform includes a wide range fiber optic transport products for satellite and microwave communications from 1 MHz to 40 GHz. These units can be used to construct transparent inter- and intra-facility links for RF and microwave signal transport, antenna remoting, electronic warfare systems and other high-dynamic-range applications.

optiva | PLATFORM

Optiva is a completely modular, hot-swappable platform. Both 19" rack-mount and compact tabletop, or wall-mountable enclosures are available. The 3 RU 19" rack-mount, fan-cooled enclosures Model OT-CC-16F can support up to 16 insert cards and utilize two dual-redundant, hot-swappable, 200 watt power supplies. The 1 RU 19" rack-mount, fan-cooled enclosure Model: OT-CC-6-1U can accommodate 6 insert cards and utilizes two hot-swappable 60 watt power supplies. Compact two-slot OT-DTCR-2 enclosures are also available that use an external wall-mount power supply.

[^]Tx: RF amp 35 dB gain, attenuation range 0 to 15 dB

Absolute Maximum Ratings

Stresses in excess of the absolute maximum ratings can cause permanent damage to the device. These are absolute stress ratings only. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of the datasheet. Exposure to absolute maximum ratings for extended periods can adversely affect device reliability.

Laser Safety

This product meets the appropriate standard in Title 21 of the Code of Federal Regulations (CFR). FDA/CDRH Class 1M laser product. All versions of this laser are Class 1M laser product, tested according to IEC 60825-1:2007 / EN 60825-1:2007. An additional warning for Class 1M laser products. For diverging beams, this warning shall state that viewing the laser output with certain optical instruments (for example: eye loupes, magnifiers, and microscopes) within a distance of 100 mm may pose an eye hazard. For collimated beams, this warning shall state that viewing the laser output with certain instruments designed for use at a distance (for example: telescopes and binoculars) may pose an eye hazard.

Wavelength = 1.3/1.5 μ m.

Maximum power = 30 mW.
