

## **AOTF Acousto-Optic Tunable Filter System**

**YSL Photonics**' AOTF system is a simply plug and play module with any of the YSL supercontinuum system. For each integrated AOTF crystal, the system enables up to 8 simultaneous tunable wavelength channels. Combines of three different crystals, the AOTF module covers the entire supercontinuum spectrum from 400nm to 2400nm. The AOTF module can be equipped with either one or two of the AOTF crystal, according to customers' demand. The AOTF offers a free-space collimated beam as standard optical output. As an alternative, a single-mode fiber delivered output is also available.

## Features:

- 400-2400nm filter range
- Simultaneous 8 channels output
- Linear polarized output
- Easy plug & play
- User friendly GUI

## **Applications:**

- High resolution microscopy
- Fluorescence microscopy
- Nanophotonics
- Replace for several single wavelength laser
- Material characterization

YSL Photonics Co., Ltd. No. 6, 2nd Optoelectronic Park Road, East Lake Hi-tech Development Zone, Wuhan City, Hubei Province, 430078 P.R. China http://www.yslphotonics.com

## Specifications:

	AOTF		
AOTF Crystals	VIS	NIR	IR
Wavelength Range	400nm~650nm	650nm~1100nm	1100~2000nm
Filter Bandwidth	2nm~7nm	2nm~6nm	4~16nm
AOTF Diffraction Efficiency		>90%	
Output Efficiency		>40%	
Polarization		Linearly Polarized
